

Janhavi Sahasrabudhe

Program Manager | Analytics & Technology | IT & Digital Data-Driven Delivery

mscsjanhavi@gmail.com | 742-085-0160 | [LinkedIn](#) | [Portfolio](#)

Professional Summary: Program Manager with 5+ years of experience leading cloud and data-driven initiatives across Azure platforms. \$3M+ in cost savings, improved KPI reports efficiency by 70%, led cross-functional teams across 12+ projects using Agile. Data-driven decision making, product thinking and scalable program execution.

Core skillset:

- Project & Delivery Management:** Agile (Scrum), roadmap planning, stakeholder management, RAID, sprint execution
- Data & Analytics:** KPI dashboards (Power BI), StreamLit, SQL, data visualization, telemetry analysis, NoSQL
- Tools & Platforms:** Microsoft Azure, COSMOS DB, JIRA, Confluence, Notion, Google Workspace, MS Office, C#
- Process & Operations:** Workflow optimization, incident management, documentation & SOP creation, service reliability monitoring, continuous improvement
- Technical Context:** Microsoft Azure (IaaS, PaaS, SaaS), Cosmos DB, data pipelines & analytics
- AI-Enabled Delivery:** Using generative AI tools for reporting automation, documentation, summarization, workflow support.

Experience:

Ecowiser – Program Manager (04/2024 – 10/2024)

- Scaled user acquisition through data-backed growth experiments, increasing monthly views by 60% and generating 10K+ new impressions per month.
- Improved monetization across B2C and B2B channels, increasing revenue contribution from 7% to 20% and boosting daily active users by 7.5%.

Salt Studio – Program Manager (01/2022 – 08/2023)

- Led 6 cross-functional teams, reducing project costs by 18% while maintaining delivery timelines.
- Built partnerships with 10+ vendors, reducing response time by 50% and improving vendor satisfaction by 30%.
- Implemented sprint-based execution models, reducing project handover errors by 24%.

Microsoft – Program Manager, Azure (02/2016 – 11/2017)

- Managed Azure data platforms (100 PB to 1 EB), reducing 24–30 daily customer issues through telemetry-driven diagnostics.
- Led Agile execution across 12 projects, improving service quality and operational efficiency by 8.5%.
- Delivered \$3M in cost savings by optimizing unused cloud resources and data streams.
- Built Power BI dashboards across 10+ services, increasing visibility by 40% and reducing reporting effort by 70%.

Microsoft – Service/Software Engineer Intern, Azure GNS (05/2015 – 08/2015)

- Developed internal analytics tools using Azure SQL and Power BI, improving team productivity and insights by 33%.

Cognizant – Programmer/Business Analyst (08/2012 – 11/2013)

- Analyzed 150+ financial applications, identifying process gaps and improving operational efficiency.
- Led UAT and defect tracking, improving system reliability and business workflows.

Education:

MS, Computer Science – Purdue University

BE, Information Technology – University of Pune

Certifications:

- Business Analytics – Wharton School Of Business
- Google Project Management Certificate

- Generative AI for Project Managers – PMI
- McKinsey Forward Program - [McKinsey.org](https://www.mckinsey.org)
- CISCO AI Business Practitioner (AIBIZ)
- CISCO AI Technical Practitioner (AITECH)

Projects:

[-AI-Incident/Ticket Monitoring System](#) - Automated issue detection and alerting using telemetry data.

[-AI-Powered Program/Project Business Intelligence System](#) - Built predictive and descriptive analytics dashboards.

[-AI Cloud Cost Optimization System](#) - Identified unused resources and improved cost efficiency.
